Sutton, Greater London

Profile

First Class Software Engineering graduate with hands-on experience building full-stack applications using modern languages and frameworks such as Java, Kotlin, C#, and React. With experience designing responsive user interfaces, implementing RESTful APIs, and working with relational and cloud-based databases. Passionate about writing clean, maintainable code and contributing to collaborative Agile teams. Now seeking a junior developer role to grow my skills further and make a meaningful impact on real-world software projects.
